Deprivation Index²

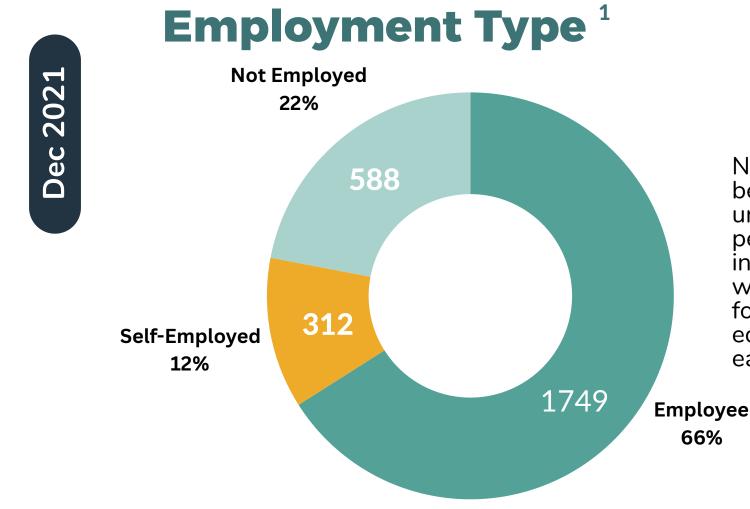

NZDep is an area-based measure (developed by the University of Otago) of **relative socio-economic deprivation**. Small areas deprivation scores are grouped into deciles.

Dimension of Deprivation	Description of variable (in order of decreasing weight in the index)		
Communication	People who have no access to internet at home		
Income	People aged 18-64 receiving a means tested benefit		
Income	People living in equivalised* households with income below an income threshold		
Employment	People aged 18-64 unemployed		
Qualifications	People aged 18-64 without any qualifications		
Owned Home	People not living in own home		
Support	People aged under 65 living in a single-parent family		
Living Space	People living in equivalised* households below a bedroom occupancy threshold (overcrowded houses)		
Living Condition	People living in dwellings that are always damp &/or always have mould greater than A4 size		

^{*}Equivalisation: methods are used to control for household size/composition

Katikati has a Deprivation Index of 7, suggesting levels of deprivation are present within its community. Decile 1 represents areas with the least deprived scores, decile 10 represents areas with the most deprived scores.

Employment status of Katikati's working age adults

NB "Not employed' rate will be higher than the unemployment rate, as all people 15-64 years are included, including those who are not actively looking for work such as those in education, caregivers and early retired 588
